

PRESS RELEASE

EPOS empowers its range of IMPACT 5000 DECT headsets with new USB dongle – Get organized. Get mobile.

The premium audio brand, EPOS – part of the Demant Group – today announces the launch of the IMPACT SDW D1 USB Dongle – a neat portable solution compatible with EPOS' IMPACT 5000 Series of DECT headsets to ensure flexibility and optimize productivity across high-density DECT environments.

October 1, 2020: With the recent global shift towards a more remote working style, the security of audio solutions has never been more relevant for businesses than it is today. To support organizations and professionals to overcome density issues, and ensure that their audio solutions are as dynamic as they are, EPOS today reveals the IMPACT SDW D1 USB Dongle – a true plug-and-play solution designed specifically to complement and optimize the brand's portfolio of DECT headsets within the IMPACT 5000 Series.

Users can use the new dongle together with their preferred IMPACT 5000 headset to enhance mobility by simply applying it to their PC. Professionals who only have a single headset to work from anywhere – in the office where Bluetooth is not allowed and from home – will now have the opportunity to bring their laptop and headset to their desired workplace wherever it may be without having to bring a base station. Additionally, organizations who have applied a hot desking strategy can keep desks clear and flexible for workers to hot desk effectively in dense office environments. Users can switch stations as needed and maintain call quality with a simple gadget that keeps their laptop and headset seamlessly connected. The USB dongle can be purchased separately to upgrade the user's existing IMPACT 5000 solution or as a bundle along with the IMPACT SDW 5011, 5031 or 5061.

IMPACT 5000

The IMPACT 5000 Series is a range of wireless DECT headsets for modern office professionals providing future-proof device flexibility, next generation communication quality and advanced security to modern work environments. IMPACT 5000 meets the challenges of evolving modern workplaces by providing a communication tool that lives up to users' expectations for multidevice usability, security, and seamless customer interaction.

EPOS' IMPACT Line is designed to ensure excellent customer experiences with a portfolio of high-end audio tools that ensure optimal comfort, easy call handling and rich, natural sound – all while reliable, intelligent technologies filter out unwanted noise, enhance audio and boost efficiency.

The IMPACT SDW D1 USB Dongle will be available through Europe and the ANZ Region as of October 2020.

About EPOS

EPOS is an audio and video solution company developing and selling devices for business professionals and the gaming community. Based on leading and advanced technologies, the Danish founded company delivers high-end audio and video solutions with design, technology and performance as paramount parameters.

The establishment of EPOS is based on the decision to let the business segments of the joint venture – known as Sennheiser Communications – between Sennheiser Electronic GmbH & Co. KG and Demant A/S evolve in different set-ups. Alongside the introduction of a new own-branded portfolio, EPOS continues to sell the current Sennheiser Communications portfolio co-branded as EPOS | SENNHEISER.

EPOS is part of the Demant Group – a world-leading audio and hearing technology group. As such, it builds on more than 115 years of experience of working with innovation and sound. With headquarters in Copenhagen, Denmark, EPOS operates in a global market with offices and partners in more than 30 countries.
